

Sammy L.I. Chan started his career in Materials Engineering in England, where he received an Honors BSc(Eng) in Metallurgy from Imperial College, and a PhD from the University of Cambridge. After a year of postdoctoral fellowship there he joined National Taiwan University in 1986, first as an associate professor, then a full professor. Chan moved to University of New South Wales, Australia in 2003, and leads a vibrant research group on energy materials, corrosion engineering and metal matrix composites. He publishes extensively in these areas, and has authored and co-authored over 150 papers in international journals and conferences, in addition to several book chapters on energy materials. Chan is a Fellow of Institute of Materials and Australian Institute of Energy. He is also a Chartered Scientist and a Chartered Engineer. Chan took the role of editor of Materials Chemistry and Physics in 2009. He also holds several honorary professorial positions at other universities.
